Winery Job Index Sees Seventh Month of Growth From 2012

The Winery Job Index in August increased 7% from August 2012, marking the seventh month of continuing growth this year. Hospitality job hiring activity was the fastest growing category, according to Winejobs.com, which publishes the index.

Winery Job Index »	Month	12 Months
	August 2013	194
	August 2012	181

The August increase in job postings was driven by a big increase in hospitality jobs that buoyed the index despite lower activity in the two other job categories. The hospitality index increased 44% from its level in August 2012. The sales and marketing index decreased 8% and the winemaking job index decreased 9% from August 2012.
